DETAILED ACTION

On page 3 lines 10 – 11, Applicant recites "For purposes herein, the grouping of systems is collectively referred to as a "hub" ". However, in a computer environment, one of ordinary skill in the art would refer "Hub" as a device used to connect several computers together. For the purpose of examination, examiner reads "Hub" as system.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over "Mortgages For Dummies" a book by Eric Tyson hereinafter known as Tyson in view of Fraser et al. US Patent 5,885,947.

Regarding claims 1 and 4, Tyson disclose Lenders must find out what the house you want to mortgage is currently worth.

Application/Control Number: 09/756,682

Art.Unit: 3629

They do this by getting an appraisal (receiving a request for an appraisal) from an authorized appraising company (Hub);

transmitting information related to request for appraisal to appraiser;

a written report is prepared by the appraiser (receiving information relating to appraising work from appraiser); and,

Lenders get written appraisal report from appraiser (transmitting a completed appraisal containing information relating to appraising work).

Tyson does not disclose a computer-implemented method for an appraisal. However, Fraser discloses system and method where broker stations, lender stations, and the transaction server can be coupled using multiple access methods, including internet, intranet, or dial-up or leased communication lines [abstract] including loan processing and loan appraisal systems [col. 4, lines 30 – 45]. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Tyson as taught by Fraser to automate the manual process of loan processing (In re Venner, 262 F.2d 91, 95, 120 USPQ 193, 194 (CCPA 1958))

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over "Mortgages For Dummies" a book by Eric Tyson hereinafter known as Tyson in view of Fraser et al. US Patent 5,885,947 and further in view of as article XML By Example Is Here by PeopleSoft hereinafter known as PeopleSoft.

Regarding claims 2 and 3, Tyson in view of Fraser does not disclose to contain XML information. However, PineappleSoft discloses the use of XML in Business to Business and Business to Consumer computer-implement online commerce. PineappleSoft discloses that XML makes it possible for computers at two companies to dialog and automatically exchange information. They can conduct business, at least the costly and slow administrative part of it automatically [page 2]. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Tyson in view of Fraser as taught by PineappleSoft to XML makes it possible for computers at two companies to dialog and automatically exchange information.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 CRF '1.111 (c) to consider the references fully when responding to this office action.

- 1. Mini et al. US Patent 6,684,196
